Noveanu Diana
Letea Roland

Feature Tour

Student Entity:

- Create
- Read (all (from memory (with persistence (xml))))
- Delete (based on id)
- Update (every bit of information except for the id)

Tema Entity:

- Create
- Read (all (from memory (with persistence (xml))))
- Delete (based on id)
- Update (can update only the deadline of a "tema", extend deadline does not work)

Nota Entity:

- Create (only to an existing student, with a completed tema)
- Read

Misc:

- Exit (with persisting local changes (in xml))
